

HIGHER NITEC IN MARINE & OFFSHORE TECHNOLOGY

MODULE OBJECTIVES

Core Modules

Quality Engineering

On completion of the module, trainees should be able to conduct preliminary safety inspection, perform hazard identification and risk assessment. Trainees should also be able to verify general arrangement drawings, monitor quality control systems, perform inspection work on brazed joints, heat treatment of materials, cable arrangement, electrical circuits, and perform dimensional checks of engineering components.

Ship Systems

On completion of the module, trainees should be able to service, maintain propulsion components system, pneumatic and hydraulic control systems components; perform inspection work on deck machinery and alignment of marine machinery.

Welding Technology

On completion of the module, trainees should be able to interpret welding procedures, perform butt, fillet, groove weld joints using submerged arc welding, shield metal arc welding, flux-cored arc welding, gas tungsten arc welding in flat, horizontal and vertical positions. Trainees should also be able to rectify weld defects, perform non-destructive tests on weld metals and do operational calibration of welding machine.

Fabrication Technology

On completion of the module, trainees should be able to produce 2-D CAD drawings and sketches of 3-D assembly drawings. Trainees should also be able to plan resources and work schedules, perform structural markings, read lines plan drawings, carry out development of plates and pipes, material surface inspections, nesting and take-off and prepare load for lifting operations.

Pipe Design and Systems

On completion of the module, trainees should be able to produce P & ID drawings, isometric drawings of pipe routing plan and prepare pipes cutting plans. Trainees should also be able to perform pipe spool assembly, dimension checks on pipe spools, and perform leak tests on piping systems.

On-The-Job Training I

On completion of the module, trainees should be able to apply and integrate Year 1 skills and knowledge acquired from classroom training and further develop competencies at the workplace.

On-The-Job Training II

On completion of the module, trainees should be able to apply and integrate Year 2 skills and knowledge acquired from classroom training and further develop competencies at the workplace.
