

ISC IN HEALTH CARE (Home Care)

MODULE OBJECTIVES

Basic Health Care

On completion of the module, students should be able to perform basic vital signs monitoring, assist in basic health assessment, perform infection control measures, and assist in clinical procedures.

Home & In-patient Care

On completion of the module, students should be able to assist in personal and grooming needs of clients, and assist/facilitate clients in basic and instrumental activities of daily living.

Home Care

On completion of the module, students should be able to assist clients with their nutritional needs and elimination needs.

On-the-Job Training

This module will provide students with hands-on opportunity to integrate knowledge and skills in work environment. On completion of the module, trainees will be able to perform health care and housekeeping tasks like feeding and making beds, providing personal grooming and hygiene services, assist in lifting, moving and transporting elderly in a nursing home setting.
