

# WORK-STUDY DIPLOMA IN REHABILITATION CARE

---

## MODULE OBJECTIVES

### Core Modules

#### **Assessment & Screening**

On completion of this module, trainees should be able to provide basic care and conduct therapy assessment and review for clients with different medical conditions.

#### **Rehabilitation Studies 1**

On completion of this module, trainees should be able to conduct simple assessments and interventions for the older population and individuals with stroke.

#### **Community Reintegration**

On completion of this module, trainees should be able to conduct simple community and home reintegration training.

#### **Group Dynamics & Facilitation**

On completion of this module, trainees should be able to plan, conduct and evaluate group activities and exercises for different client populations.

#### **Rehabilitation Studies 2**

On completion of this module, trainees should be able to conduct simple assessments and interventions for individuals with orthopaedic conditions and musculoskeletal disorders.

#### **Rehabilitation Studies 3**

On completion of this module, trainees should be able to conduct simple assessments and interventions for special population groups, such as intellectual disability, Parkinson's disease and cardiopulmonary conditions.

#### **Company Project**

On completion of this module, trainees should have applied their acquired competencies in an authentic project that would value-add to the company.

#### **On-the-Job Training**

On completion of the module, trainees should be able to apply the skills and knowledge acquired at ITE College and workplace to take on the full job scope, including supervisory function, where appropriate, at the company.
