

**List of Competencies for On-the-Job Training (OJT)  
Work-Study Diploma in Cyber Security & Forensics**

Note: LOC is subject to changes due to curriculum review/ development

<b>S/N</b>	<b>List of Competencies (Standard)</b>	<b>Company to indicate '✓' for OJT competencies it can provide</b>
1	Manage security education and awareness	
2	Facilitate stakeholder management	
3	Manage changes to address information security gaps	
4	Manage wired network security infrastructure	
5	Manage wireless network security infrastructure	
6	Manage IT security infrastructure	
7	Manage server security	
8	Manage virtualisation security infrastructure	
9	Maintain system security documentation	
10	Manage threat detection	
11	Automate threat detection	
12	Prepare threat detection report	
13	Prepare for incident handling	
14	Perform incident response	
15	Implement Incident recovery	
16	Plan for vulnerability assessment	
17	Perform vulnerability assessment	
18	Prepare security assessment report	
19	Facilitate penetration testing	
20	Perform penetration testing	
21	Perform security control management	
22	Plan digital forensics operation	
23	Extract digital forensics evidence	
24	Prepare forensics report and recommendations	
	<b>Sub-total of Competencies (Standard)</b>

# WORK-STUDY DIPLOMA IN CYBER SECURITY & FORENSICS

---

## MODULE OBJECTIVES

### Module 1: Risk Management & Compliance

On completion of the module, trainees should be able to drive security education and awareness in an organisation by providing advice and guidance on potential risks, mitigation strategies and best practices. They should also be able to manage security program, solutions, products and services, as well as to facilitate stakeholder expectations and needs.

### Module 2: Network Security Management

On completion of the module, trainees should be able to set up, configure, secure, and monitor network system and wireless network for anomalous traffic and identification of intrusions. They should also be able to configure security appliances such as firewall, end-point security, as well as intrusion detection and prevention system, as well as to address identity management requirements and perform logging for network traffic monitoring.

### Module 3: System Security Management

On completion of the module, trainees should be able to implement system security and detect unauthorised system intrusion. They should also be able to set up, configure and secure a virtualised infrastructure.

### Module 4: Security Operation Management

On completion of the module, trainees should be able to monitor security operation. They should also be able to automate threat analysis using innovative technologies and tools.

### Module 5: Security Incident Management

On completion of the module, trainees should be able to manage incidence of cyber-attack or breach. They should also be able to automate incident handling using appropriate tools.

### Module 6: Security Assessment

On completion of the module, trainees should be able to perform security scanning to uncover vulnerabilities and weaknesses. They should also be able to elevate extraction and analysis manually and using automated tools.

### Module 7: Security Testing

On completion of the module, trainees should be able to facilitate security testing to uncover weaknesses using intrusive approach. They should also be able to automate the process.

### **Module 8: Cyber Forensics Procedure**

On completion of the module, trainees should be able to gather cyber-attack evidence from various sources, escalate the cyber security incident and prepare forensics report for further investigation and analysis.

### **Module 9: Company Project**

On completion of the module, trainees should have applied their acquired competencies in an authentic project that would value-add to the company.

### **Module 10: On-the-Job Training**

On completion of the module, trainees should be able to apply the skills and knowledge acquired at ITE College and workplace to take on the full job scope, including supervisory function where appropriate, at the company.

## Training Pattern for WSDip in Cyber Security & Forensics

### Block Release

- Scheduled blocks of continuous Off-Job-Training (Off-JT) Lessons, 9 weeks annually, in ITE College East

*\*Off-JT day must be a paid working day, included in employment contract.*

Year	January to March	April to June	July to September	October to December
Year 1		Block Release Training 9 weeks, 5 days/week at ITE College East	On-the Job Training (OJT) Full-time in company	
Block 1				
Year 2	On-the Job Training (OJT) Full-time in company		Block Release Training 9 weeks, 5 days/week at ITE College East	On-the Job Training (OJT) Full-time in company
Block 2				
Year 3	Block Release Training 9 weeks, 5 days/week at ITE College East	On-the Job Training (OJT) Full-time in company		Trainee in Company Trainee in ITE College East
Block 3
