

## **e-LEARNING AND ITS BENEFITS**

From 2015, modules will incorporate at least 10% of theory hours to be delivered under e-Learning.

Under e-Learning, the Theory hours will be scheduled into face-to-face and self-directed learning (SDL) sessions.

- During the face-to-face sessions, the lecturer will be present in class to guide the students' learning.
- During the SDL sessions, students will access online materials on their own using ITE's myConnexion system and any other learning resources provided by the lecturer. There will be no classroom lessons. Students may email their lecturers if they need help.

e-Learning aims to enable students to have more flexibility in 'when' and 'where' they learn through the use of technology. Students may also participate in learning activities such as group discussions, attempt online tests and quizzes to check their progress or review what they have learned.

## **REQUIREMENTS OF e-LEARNING**

Students need to have Internet access in order to access myConnexion. If students do not have access to the Internet, self-access rooms would be made available at the College. Your lecturer will inform you of the schedule when the term starts.

## **ATTENDANCE COMPUTATION**

SDL hours are included in the total attendance hours to determine students' eligibility to sit for the end-of-module examination. However, SDL hours are not claimable under WDA's Absentee Payroll funding.
